FIRE EXTINGUISHER TRAINING

COURSE OBJECTIVES

Upon successful completion of this combination theory & practical training course, the participant will have a good understanding of:
- Different types of fires and suppression techniques
- How to safely and effectively use a fire extinguisher
- Alberta Occupational Health & Safety Regulations pertaining to Fire Extinguisher training
- Fire Extinguisher Regulations & Code Requirements

COURSE CONTENT

Upon successful completion of this training course, the participant will be able to:
- Determine the appropriate response to a fire
- Describe and explain the combustion process
- List and describe the five classes of fire
- List the 4 means by which fires can be extinguished
- Identify the most common types of fire extinguishers
- Determine which fire extinguishers are designed for certain classes of fire
- Determine when the fire department is to be called
- Demonstrate the steps involved in P.A.S.S. (Pull the pin, Aim, Squeeze, Sweep)
- Demonstrate how to use a fire extinguisher to control a small fire

CERTIFICATION

Upon successful completion of this training course, each participant will receive:
- A Certificate of Completion

INSTRUCTORS

All Good Job Fire & Life Safety Training instructors are professionally trained firefighters with several years of practical fire-fighting experience.

PRE-REQUISITE

Each participant shall have a generous amount of common sense and a genuine interest in learning about proper fire suppression techniques and fire-fighting equipment.

COURSE LOCATION AND EQUIPMENT

This "hands-on" Fire Extinguisher training course can be conducted at a site of your choosing. We will be using the environmentally-friendly Bullex (www.bullexsafety.com) Fire Extinguisher training system for the practical training.

COMMITMENT & COST

Each participant must be able to commit to a half-day of theory and practical training. This course will cost each participant $125 + GST.
